

## **Nora Perry notes on initial build for Josh G**

### **general layout**

- make background image deeper orange like mockup back
- bounding box for all the content could be enlarged a bit on all sides (50px sides, 20px top and bottom?)
- add a bit more padding to the top of image descriptions and make point size larger
- get rid of double line at the bottom of bounding box above now playing

### **home**

- make home page image to scale instead of fitting to square

### **history**

- font size on history page body text bigger

### **members**

- make member images larger

### **music**

- make album images larger, green border can remain, same ratio as member images
- font size on music page can all be bigger

### **now playing**

- center song title in now playing section

### **section buttons**

- when section buttons are selected make line below them disappear
- stylize pause and play button to be stroke no fill like the now playing speaker
